

Latihan Teori

1. Public class nomor1 {

```
    public static void main(String [] args) {
```

```
        byte aa = 5 ;
```

```
        byte bb = 6 ;
```

```
        double cc = 0.5 ;
```

```
        double ab = aa + bb ;
```

```
        double abc = aa * bb * cc ;
```

```
        double bc = bb / cc ;
```

```
        System.out.print ("Nilai 5+6 = " + ab);
```

```
        System.out.print ("Nilai 5*6*0.5 = " + abc);
```

```
        System.out.print ("Nilai 6/0.5 = " + bc);
```

```
    }
```

```
}
```

2. import java.util.Scanner;

```
public class nomor2 {
```

```
    public static void main (String [] args) {
```

```
        Scanner input = new Scanner (System.in);
```

```
        String nm, almt ;
```

```
        int umur ;
```

```
        System.out.print ("Masukkan nama anda " );
```

```
        nm = input.nextLine();
```

```
        System.out.print
```

```
        almt = input.nextLine();
```

```
        System.out.print
```

```
        umur = input.nextLine();
```

```
        System.out.println();
```

```
        System.out.println ("Saudara
```

```
        " + nm );
```

```
        " + almt);
```

```
        System.out.println ("Tinggal di
```

```
        System.out.println ("Rumah
```

```
        " + umur );
```

```
    }
```

```
}
```
